Editorial Programme 2010

Profile of the Magazine

„European Security and Defence“ is a specialist magazine, which keeps track of events and developments in the defence and security arena. Our professional writers and contributors investigate, report, analyse, comment and – if necessary – criticise.

The magazine's objective is to describe, explain and interpret German security policy – which extends far beyond conventional defence with military forces – in all complex and sophisticated correlations. „European Security and Defence“ analyses the implications behind the stories and forecasts the consequences of current affairs from an appropriate distance. As an unbiased periodical „European Security and Defence“ provides answers to current and upcoming questions about international affairs, business, technology and defence matters. Opinions are considered in analytical comments, which are based on neutral and in-depth investigations.

Each issue provides readers with analyses, expert assessments and comprehensive information on

- International security political issues and decisions from the point of view of the North Atlantic Alliance and the European Community;
- The political, defence, business and technology environment against the background of national security considerations.

Readers of “European Security and Defence” stay abreast with what really matters at decisive levels!
